

# PALLITE

PALLETS = PALLET BOXES = LAYER PADS

## LIGHTWEIGHT PAPER PALLETS, PALLET BOXES AND COMPONENTS DESIGNED TO REDUCE THE TOTAL COST OF DELIVERY.

The PALLITE® range is designed to eliminate day-to-day difficulties by helping clients identify, understand and overcome issues in their supply chain. The PALLITE® range of components provides the extra protection your delivery requires.

## COMPONENTS

### ULTRA LIGHTWEIGHT

Euro PALLITE®  
pallets weigh in at  
up to 18.2kg lighter  
than wood

### HONEYCOMB TECHNOLOGY

Made from paper, not  
corrugate - lighter than  
wood but stronger  
than corrugate.

### SUPER STRONG

Hold up to 750kg in  
open-beam racking -  
capable of carrying  
over one tonne.

### ISPM15 EXEMPT

Ideal for exporting  
consignments with  
complete ISPM15  
exemption.

## LAYER PADS

The final mile in your supply chain often presents the greatest risk. Protect your consignment through the all-important delivery stage using PALLITE® layer pads for stacking, reinforcing or separating loads. Layer pads create a protective layer to prevent damage from strapping and banding.

## PROVIDE AN EXTRA LAYER OF PROTECTION

Manufactured using 25mm or 15mm honeycomb deck, layer pads can be made according to your specific dimensions, helping you to effectively protect your consignment and reduce the risk of damage.

The honeycomb design of our layer pad is stronger than corrugate increasing its ability to absorb potentially damaging vibrations and is lighter than chipboard alternatives.

## CHOOSING PALLITE® LAYER PADS BRINGS A RANGE OF BENEFITS:

- Reduce the risk of damages by stabilising your load with honeycomb deck
- Use edge protectors to protect your consignment from damage from strapping and banding
- Reinforce your load with layer pads to absorb vibration
- Layer pads are lightweight reducing airfreight costs
- Clean and hygienic, layer pads give added protection to pharmaceutical products and food ingredients

## PALLET FEET

Put your supply chain on a firm footing with PALLITE® pallet feet. Add to boxes and consignments and you can manoeuvre them with ease, preventing contact with the floor and keeping contamination to a minimum. Simply peel back the adhesive tape and stick the pallet feet firmly to the bottom of your box.

## “Phoenix Fragrances told us:

We were looking for a supplier who could respond quickly to our requirements and create bespoke designs to a challenging specification. We have also been working towards reducing our impact on the environment. PALLITE® products are all 100% recyclable, offering fantastic environmental benefits. The team understood our needs perfectly and were extremely helpful.

## CHOOSING PALLITE® PALLET FEET BRINGS A RANGE OF BENEFITS:

- Save time on palletisation
- Save space on pallet storage
- Reduce the cost of purchasing pallets
- Reduce your environmental impact - PALLITE® is made from 100% recyclable materials from sustainable sources
- Strong enough to hold up to 750kg
