

# PALLITE

PALLETS = PALLET BOXES = LAYER PADS

LIGHTWEIGHT PAPER PALLETS,  
PALLET BOXES AND COMPONENTS  
DESIGNED TO REDUCE THE  
COST OF DELIVERY.

PALLITE® is a range of lightweight, strong and recyclable transit packaging that includes pallets, layer pads and collapsible pallet boxes. PALLITE® provides a clean, lightweight alternative to wood that is exempt from ISPM15.

## PALLET BOXES

Honeycomb technology to robustly protect your consignment

Strong enough to enable stacking of 750kg

ISPM15 exemption means less paperwork and no requirement for heat treatment

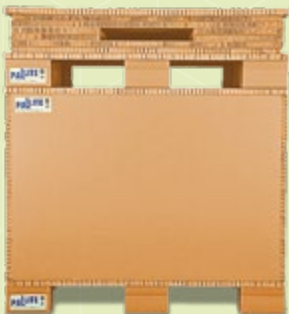

Increased protection for irregular shapes using bespoke inserts and cradles

Fully collapsible to save storage space, PALLITE® boxes take less than ten seconds to build.

Stackable to save space, time and money.

The award-winning PALLITE® pallet box is designed to protect your consignment throughout its supply chain journey, and to ensure that you minimise your distribution costs.

Inferior pallet boxes may reduce outlay in the short term but the PALLITE® pallet box delivers better value through the strength of its design. With a 25mm reinforced honeycomb wall, the PALLITE® pallet box is strong enough to withstand the impact of any journey. Its collapsible design helps to save valuable storage space.

## CHOOSING PALLITE® PALLET BOXES BRINGS A RANGE OF UNBEATABLE BENEFITS:

### SAFETY FIRST

- Protect your team and reduce the risk of back injuries by choosing loading windows that make boxes easier to fill
- With no splinters or nails, the risk of cuts and scratches is eliminated

### REDUCE COSTS

- Dramatically reduce your distribution costs with a pallet box that is up to 72% lighter than a wooden pallet and crate combination, whilst retaining great integrity
- Transport costs can be reduced using bespoke pallet and box sizes that match container and vehicle dimensions in stackable configurations
- Box assembly takes less than ten seconds saving time and effort for your team
- Loading windows help your team to fill boxes rapidly
- Match your box with a PALLITE® pallet and your entire consignment will be exempt from ISPM15 regulations
- Save space by stacking up to 750kg on top of a PALLITE® pallet box

### STRONG AND RELIABLE

- The 25mm protective wall helps to minimise damage making the PALLITE® pallet box ideal for high value, luxury or fragile goods
- Secure loads with edge protectors to minimise damage from strapping and banding

### SUPPORT SUSTAINABILITY

- Made with 100% recyclable materials from sustainable sources, PALLITE® pallet boxes help you to reduce your impact on the environment

### PALLITE® offers bespoke inserts, locators and cradles created from a honeycomb deck using CNC machining. Benefits include:

- Less movement leading to greater protection
- Reduction in damage
- Enhanced load security
- 100% recyclable
- Savings on transport costs through reduced weight
- Effective performance through custom design
